Subject Index

0100 Costs

0101 Budgeting

Budgeting In Hierarchical Systems Under Uncertainty; Sinuany-Stern, Zilla, Meir J. Rosenblatt; March; p. 2.

0103 Cost estimating

Maximin Vs. Expected Profit And The Faithful-Newsboy Problem; Nuttle, Henry, Yahya Fathi; June; p. 238.

Determining The Future Costs Of Lifetime Warranties; Wells, Charles E.; June; p. 178.

A Procedure for Estimating the Number of Competitive Bids for Procurement; Silver, Edward A.; December; p. 469.

0200 Employee relations

0300 Engineering economics

0400 Facilities planning, design

0402 Facility location

An Evaluation Of The Dual As A Lower Bound In Facilities Location Problems; Love, Robert, Paul Dowling; June; p. 160.

A Stochastic Uncapacitated Facility Location Problem: A New Formulation and Extensions to the Capacitated Problem; Tcha, Dong-Wan, Young-Soo Myung; December; p. 461.

0405 Plant layout analysis

A General Model Of A Production Line With Intermediate Buffer And Station Breakdown; Yeralan, Sencer, Eginhard J. Muth; June; p. 130.

Matching Based Interactive Facility Layout; Montreuil, Benoit, H. Donald Ratliff, Marc Goetschalckx; September; p. 271

0406 Plant layout principles

Selection Of A Threshold Value Based On Material Handling Cost in Machine-Component Grouping; Seifoddini, Hamid, Philip M. Wolfe; September; p. 266.

0500 Functional operations

0505 Purchasing

A Procedure for Estimating the Number of Competitive Bids for Procurement; Silver, Edward A.; December; p. 469.

0600 Human engineering

0602 Biomechanics

A System For Measurement Of Isokinetic Strength For Estimation Of Load Handling Capacity; Aghazadeh, F., M.M. Ayoub; September; p. 348.

On The Validity Of An Isometric Biomechanical Model of Worker Strengths; Chaffin, Don B., A. Freivalds; S. R. Evans; September; p. 280.

0606 Personnel scheduling

The Cost of Consecutivity in the (5,7) *Cyclic Staffing Problem*; Vohra, Rakesh V.; September; p. 296.

An Algorithm For A Class Of Three-Dimensional Assignment Problems Arising in Scheduling Applications; Gilbert, Kenneth C., Ruth Bisgrove Hofstra; March; p. 29.

0700 Incentive plans

0800 Industrial engineering

0900 Industries

0905 Transportation, distribution

Improving Through Flight Schedules; Bard, Jonathan F., Ian G. Cunningham; September; p. 242.

0906 Others

The Calhoun Textile Mill Case: An Exercise On The Significance of Linear Programming Model Formulation; Camm, Jeffrey D., Suresh Tadisina, P. M. Dearing; March; p. 23.

1000 Management

1100 Material handling

1103 Costs

Selection Of A Threshold Value Based On Material Handling Cost in Machine-Component Grouping; Seifoddini, Hamid, Philip M. Wolfe; September; p. 266.

1105 Dispatching, scheduling

On Sequencing Retrievals In An Automated Storage/Retrieval System; Mcginnis, Leon, M. H. Han, J. S. Shieh, J. A. White; March; p. 56.

Improving Through Flight Schedules; Bard, Jonathan F., Ian G. Cunningham; September; p. 242.

1200 Methods engineering

1201 Automation, mechanization

Maximizing Robot Production Rates for Simple Insertion Operations; Boucher, Thomas O.; December; p. 386.

1204 Identification systems

Part Positioning with Feature Marks for Computer Vision Systems; Goldman, Jay, C. A. Chang, J. M. Pan; June; p. 182.

1205 Manufacturing engineering

A Successful Application of Job Enlargement/Enrichment at Toyota; Muramatsu, Rintaro, H. Miyazaki; K. Ishii; December; p. 452.

1213 Work design, methods improvement

Part Positioning with Feature Marks for Computer Vision Systems; Goldman, Jay, C. A. Chang, J. M. Pan; June; p. 182.

1214 Work analysis techniques

A System For Measurement Of Isokinetic Strength For Estimation Of Load Handling Capacity; Aghazadeh, F., M. M. Ayoub; September; p. 348.

On The Validity Of An Isometric Biomechanical Model of Worker Strengths; Chaffin, Don B., A. Freivalds; S. R. Evans; September; p. 280.

1300 Quantitative methods

1301 Mathematical models

Evaluating Flexible Manufacturing Systems; Miltenburg, G. John, Itzhak Krinsky; June; p. 222.

Production Learning And Quality Control; Tapiero, Charles S.; December; p. 362.

A Decomposition Method For The Approximate Evaluation Of Capacitated Transfer Lines with Unreliable Machines and Random Processing Times; Gershwin, Stanley B., Yong Choong; June; p. 150.

Solving Quadratic Assignment Problems By "Simulated Annealing"; Wilhelm, M. R.; March; p. 107.

On the Equivalence of Multi-Stage Production Lines and Two Stage Lines; Wijngaard, Jacob, M. B. M. de Koster; September; p. 351.

An Approximate Model Of Multistage Automatic Transfer Lines with Possible Scrapping of Workpieces; Jafari, Mohsen A.; September; p. 252.

A Dual-Cost Heuristic For The Capacitated Lot Sizing Problem; Trigeiro, William W.; March; p. 67.

A Branch And Bound Algorithm For A Single-Item Multi-Source Dynamic Lot Sizing Problem with Capacity Constraints; Tufekci, Suleyman, S. Selcuk Erenguc; March; p. 73.

Matrix-geometric And Recursive Algorithm Solution of a Two-stage Unreliable Flow Line; Buzacott, John A., Drazen Kostelski; December; p. 430.

Exact and Approximate Solutions to Two-stage Flow Lines with General Uptime and Downtime Distributions; Jafari, Mohsen A., J. G. Shanthikumar; December; p. 413.

Planned Leadtimes For Serial Production Systems; Yano, Candace Arai; September; p. 300.

An Algorithm For A Class Of Three-Dimensional Assignment Problems Arising in Scheduling Applications; Gilbert, Kenneth C., Rugh Bisgrove Hofstra; March; p. 29.

An Input/Output Control System ForThe Dynamic Job Shop; Onur, Levent, W. J. Fabrycky; March; p. 88.

1303 Programming: linear, nonlinear

The Maximum Value Of Inventory And Shortages In Production Lot Size Systems; Vemuganti, R. R.; December; p. 405.

The Calhoun Textile Mill Case, An Exercise On The Significance of Linear Programming Model Formulation; Camm, Jeffrey D., Suresh Tadisina, P. M. Dearing; March; p. 23.

1305 Simulation/games

A Fast And Flexible Family Of Distributions For Simulation Studies; Butterworth, Nick; December; p. 440.

Pseudorandom Number Assignment in Quadratic Response Surface Designs; Myers, Raymond H., James R. Hussey, Ernest C. Houck; December; p. 396.

1306 Applied probability

Effects Of Correlated Sub-Samples In Statistical Process Control; Neuhardt, John B.; June; p. 208.

1307 Experimental design

A Splitting Algorithm for Identifying Qualitative Variables Related to a Dichotomous Dependent Variable; Raz, Tzvi; June; p. 190.

Pseudorandom Number Assignment in Quadratic Response Surface Designs; Myers, Raymond H., James R. Hussey, Ernest C. Houck; December; p. 396.

1400 Production and inventory control

1403 Inventory control

Two-Parameter Approximations for Multi-Echelon Repairable Inventory Models with Batch Ordering Policy; Lee, Hau L., Kamram Moinzadeh; June; p. 140.

Modifications of Demand Distributions on the Basis of Aggregate Information; Silver, Edward A., Henrik Jonsson; December; p. 380.

Maximin Vs. Expected Profit And The Faithful-Newsboy Problem; Nuttle, Henry, Yahya Fathi; p. 238.

Stochastic Leadtimes In Two-Level Assembly Systems; Yano, Candace Arai; December; p. 372.

A Simple Method To Solve Some Simple Allocation Problems; Vidal, R. V. V.; June; p. 234.

The Safety Stock Paradox; Snyder, Ralph D.; December; p. 473.

1404 Materials management

A General Model Of A Production Line With Inermediate Buffer And Station Breakdown; Yeralan, Sencer, Eginhard J. Muth; June; p. 130.

Optimal Project Scheduling with Materials Ordering; Smith-Daniels, Dwight E., Vicki L. Smith-Daniels; June; p. 122.

Dynamically Adjusting The Number Of Kanbans In A Just-In-Time Production System Using Estimated Values of Leadtime; Taylor, Bernard W., L. P. Rees, P. R. Philipoom, P. Y. Huang; June; p. 199.

1405 Production control

A Real-Time Interactive Computer Model Of A Flexible Manufacturing System; Salvendy, Gavriel, Joseph Sharit; June; p. 167.

1406 Production planning

Maximizing Robot Production Rates for Simple Insertion Operations; Boucher, Thomas O.; December; p. 386.

A Parallel Heuristic Algorithm For Lot-Sizing In Multistage Production Systems; Afentakis, Panos; March; p. 34.

The Maximum Value Of Inventory And Shortages In Production Lot Size Systems; Vemuganti, R. R.; December; p. 405.

A Decomposition Method For The Approximate Evaluation Of Capacitated Transfer Lines with Unreliable Machines and Random Processing Times; Gershwin, Stanley B., Yong Choong; June; p. 150.

Stochastic Leadtimes In Two-Level Assembly Systems; Yano, Candace Arai; December; p. 372.

An Approximate Model Of Multistage Automatic Transfer Lines with Possible Scrapping of Workpieces; Jafari, Mohsen A.; September; p. 252.

A Dual-Cost Heuristic For The Capacitated Lot Sizing Problem; Trigeiro, William W.; March; p. 67.

A Branch And Bound Algorithm For A Single-Item Multi-Source Dynamic Lot Sizing Porblem with Capacity Constraints; Tufekci, Suleyman, S. Selcuk Erenguc; March; p. 73.

Matrix-geometric And Recursive Algorithm Solution of a Two-stage Unreliable Flow Line; Buzacott, John A., Drazen Kostelski; December; p. 430.

Exact and Approximate Solutions to Two-stage Flow Lines with General Uptime and Downtime Distributions; Jafari, Mohsen A., J. G. Shanthikumar; December; p. 413.

A Simple Method To Solve Some Simple Allocation Problems; Vidal, R. V. V.; June; p. 234.

Dynamically Adjusting The Number Of Kanbans In A Just-In-Time Production System Using Estimated Values of Leadtime; Taylor, Bernard W., L. P. Rees, P. R. Philipoom, P. Y. Huang; June; p. 199.

Disaggregate Planning For Parallel Processors; Oliff, Michael D.; June; p. 215.

1407 Production scheduling

An Exploratory Study on Stopping A Paced Line When Incompletions Occur; Lau, H. S., A. Shtub; December; p. 464.

Performance of a Manufacturing Cell with Increased Product Mix; Kekre, Sunder; September; p. 329.

Production Scheduling With Sequence Dependent Setup Costs; Foster, J. Bennett Singh, Harpal; March; p. 43.

Modification of Demand Distributions on the Basis of Aggregate Information; Silver, Edward A., Henrik Jonsson; December; p. 380.

Minimizing Weighted Absolute Deviation in Single Machine Scheduling; Fry, Timothy D., R. D. Armstrong; December; p. 446.

Optimal Project Scheduling with Materials Ordering; Smith-Daniels, Dwight E., Vicki L. Smith-Daniels; June; p. 122.

Planned Leadtimes For Serial Production Systems; Yano, Candace Arai; September; p. 300.

An Input/Output Control System For The Dynamic Job Shop; Onur, Levent, W. J. Fabrycky; March; p. 88.

Disaggregate Planning For Parallel Processors; Oliff, Michael D.; June; p. 215.

Priority Assignment Procedures In Multi-Level Assembly Job Shops; Adam, Nabil R., J. W. M. Bertrand; J. Surkis; September; p. 317.

1500 Quality control

1501 Inspection

Strategic Allocation Of Inspection Effort In A Serial, Multi-Product Production System; Shtub, Avraham, Amiya K. Chakravarty; March; p. 13.

Inspection Error Effects On Performance Measures Of A Multi-Stage Sampling Plan; Maghsoodloo, S.; September; p. 340.

The Effects Of Inspection Error On A Complete Inspection Plan; Tang, Kwei, Helmut Schneider; December; p. 422.

1502 Quality control

Economic Design Of Quality Monitoring Efforts For Multi-Stage Production Systems; Peters, Michael H., W. W. Williams; March; p. 81.

Constructing And Maintaining A Beta Process Distribution For Bayesian Quality Audit Systems; Tang, Kwei, M. Peters, J. Tang; March; p. 98.

Production Learning And Quality Control; Tapiero, Charles S.; December; p. 362.

On Product Liability And Quality Control; Marucheck, Ann S.; September; p. 355.

1504 Sampling

The Economic Design Of Sampling Control Strategies For A Class Of Industrial Process; Mcdowell, Edward D.; September; p. 289.

Multiobjective Decision Analysis For Acceptance Sampling Problems; Evans, Gerald W., Suraj M. Alexander; September; p. 308.

Economic Design Of Quality Monitoring Efforts For Multi-Stage Production Systems; Peters, Michael H., W. W. Williams; March; p. 81.

Inspection Error Effects On Performance Measures Of A Multi-Stage Sampling Plan; Maghsoodloo, S.; September; p. 340.

A Simple Method To Solve Some Simple Allocation Problems; Vidal, R. V. V.; June; p. 234.

1600 Work measurement

1609 Time measurement

A Study Of Work-Time Distributions On Unpaced Tasks; Knott, Kenneth; March; p. 50.

1700 Data processing systems design
